Course Description
Cities around the world are striving to be ‘global’. This course focuses on the development of one of the greatest of these global cities, London, from the nineteenth through to the twenty first century and investigates the nature and implications of its ‘globality’ for its built environment and social geography. We will examine how the city has been transformed by the forces of industrialisation, imperialism and globalisation and consider the ways in which London and its inhabitants have been shaped by their relationships with the rest of the world. Students will gain insight into London’s changing identity as a world city, with a particular emphasis on analysis of the city’s imperial, postcolonial and transatlantic connections; the ways in which past and present, local and global intertwine in the capital; and comparative study of urban change worldwide. The course is organised chronologically: themes include the Victorian metropolis; London as an imperial space; representations of the city in media, film and popular culture; multicultural London; London as a commercial centre of global capitalism; the impact of the Olympics and other urban ‘mega-events’; future scenarios of urban change.
Course Aims
The course will mix classroom work with experiential learning, and will be centred on field studies to sites such as Brixton, Spitalfields, Southbank, and the Olympic sites in East London to give students the opportunity to experience the city’s varied urban geographies first hand and interact with these sites in an informed and analytical way. We will consider what these sites reveal about the city’s complex histories, but also how they are used today to represent the city’s past, present and future to contemporary Londoners and tourists. The course is also intended to allow students to contextualise their own extra-curricular travels and encounters in the city during their stay and to develop their own interpretations of London as a place to live, work and play.

Requirements and Prerequisites
There are no specific prerequisites for this course. It assumes no previous knowledge of the city or of the discipline of geography; relevant geographical concepts or ideas will be introduced and explained. It is vital that students come to class having read the set texts carefully and with ideas to contribute to the discussion.

Learning Outcomes
At the end of this course, students will have the skills and knowledge to:

a. Understand the ways in which London’s identity and function as a global city have evolved from the nineteenth century to the present day
b. Contextualise the social dynamics of London in relation to the changing contexts of imperialism, postcolonialism, transnationalism and globalisation
c. Appreciate the ways in which art and culture are showcased throughout the city and contribute to London’s global impact and significance
d. Critically deconstruct the built environment and interpret its iconography and symbolism in appropriate ways
e. Engage critically with debates surrounding London’s diversity, urban regeneration, and governance, and recognize the relationship amongst socio-economic inequalities at global, national and urban scales

Developmental Outcomes
Students should demonstrate: responsibility & accountability, independence & interdependence, goal orientation, self-confidence, resilience, appreciation of differences. They will be able to communicate their ideas and research findings in both oral and written forms.

Class Methodology
Field studies form an important component of this course; attendance at these classes, which take place during our class time during selected weeks, is mandatory. Field classes present a valuable opportunity to learn about the forces which have shaped, and continue to shape, global London by focusing on specific case studies in different neighbourhoods of the city. We will interpret the sites we visit through class discussion as well as in written work and the final examination.
Students will engage with a wide variety of literature – including primary documents, literary accounts, historical interpretations and contemporary social analyses - which trace London’s physical and social transformations over the period and allow students to consider the diverse ways in which the city has been represented. Written work will allow students to interpret evidence from fieldwork and secondary research to develop their own arguments about the nature and significance of the forces shaping the city and engage with a variety of critical perspectives on its current transformation.

Background information will be provided to prepare students for the fieldwork, which is treated as classroom time: attendance is a course requirement. The attached syllabus should be understood as a provisional plan for what we will do in class. Although changes will be kept to a minimum, we may make substitutions or additions as necessary.

Readings
Weekly required readings will be made available electronic format on CANVAS. Key texts on London are also available in the CAPA Learning Resource areas and students will also have access to South Bank University library on request for additional sources: catalogue available at: http://www.lsbu.ac.uk/library/. Refer to the CAPA Library Guide for additional libraries and learning resources available in London.

It is imperative that students do the assigned readings before the class for which they are assigned, as they will be required to discuss and evaluate these ideas in the sessions. Readings will be supplemented with video footage to foster comparative analysis, introduce representations of historic and contemporary London in a variety of media, and illuminate issues of topical concern.

Field Components
CAPA provides the unique opportunity to learn about the city through direct, guided experience. Participation in field activities for this course is required. You will actively explore the global city in which you are currently living. Furthermore, you will have the chance to collect useful information that will be an invaluable resource for the papers and projects assigned in this course.

The assigned field components are listed in the weekly schedule below
Students are responsible for ensuring that they arrive at field study classes on time. The instructor will send electronic directions to field study sites in advance of the relevant class – please consult the Transport for London website to plan travel arrangements: http://www.tfl.gov.uk/

Students are also strongly encouraged to participate in co-curricular program activities.
We will make use of relevant *My Education* events and activities in class discussion where appropriate, as well as draw on students’ own individual travel experiences in the UK and Europe during the semester, such as the opportunity to visit another global city (Paris) as appropriate, to draw comparative conclusions.

**Grade Breakdown and Assessment of Learning Outcomes**

**ASSESSMENT:**

| Class Participation: | 10% |
| Urban Exploration Presentation: | 15% |
| Urban Exploration Paper (1000 words): | 20% |
| Field Study Analysis (2000 words): | 30% |
| Final Exam (2.5 hrs): | 25% |

**Assessment Task** | Grade % | Learning Outcomes | Due Date  
--- | --- | --- | ---  
Class Participation | 10% | all | Weekly  
Urban Exploration Presentation | 15% | a, b, c, d | Feb 7  
Urban Exploration Paper | 20% | a, b, c, d | Feb 21  
Field Study Analysis | 30% | all | Week 13  
Final Exam | 25% | all | Week 14
ASSIGNMENTS:

PRESENTATION
Urban Exploration: London Communities 15%
This assignment is based on an analysis of personal exploration of a specific London community or neighbourhood. Students should spend time visiting their chosen location and incorporate their own observations and insights into their analysis. Presentations should engage with specific details from the community which highlight its character and distinctive elements. You may also include photographs of the area, interviews with members of the local community, and a consideration of relevant community issues, such as the impact of cuts to government funding, and local development projects. Video material may be included but must be brief (2-3 mins).

Presenters will address the character, main points of interest, and significance of their location in terms of themes such as: society, arts and culture, architecture, historical development, environment, housing, demographics, multiculturalism, tourism, and industry and the economy. (Note: you should not address all of these themes, but should select those more relevant to your neighbourhood). Collectively, these presentations provide insight into the diverse nature of the city and its inhabitants and will allow us to identify points of comparison.

Presentations should be approx. **10 minutes duration**, and students are encouraged to be creative in their presentation technique through the use of audio/visual display etc. Students will be evaluated on their ability to creatively introduce and analyse their location, assess its significance for an understanding of London’s character as a global city, connect the topic to the main themes of the course, and generate discussion with the class through the use of questions and discussion points.

**Recommended locations include:** the City, Greenwich, Hackney, Peckham, Islington, Bloomsbury, Hammersmith, Soho & Chinatown, Newham, Lambeth, Wimbledon, Richmond, Elephant & Castle, Knightsbridge, Notting Hill, Westminster.

**Note:** Your presentation may focus on any part of London except those covered in the field studies: i.e. Brixton; Shoreditch & Brick Lane; Southbank & Bankside; Queen Elizabeth Olympic Park. Please speak to me for further suggestions & advice.

**Sources:** The primary sources for the presentation should be your own observations of the area, together with class readings, lecture material, and details from relevant field studies.

**Related web resources include:**
http://data.london.gov.uk/
http://www.economist.com/blogs/graphicdetail/2012/06/london-figures-interactive-guide;
URBAN EXPLORATION PAPER: London Communities 20%

This assignment is based on an analysis of personal exploration of a particular London community or neighbourhood. The paper will allow students to develop the themes and ideas examined in their London communities presentation. Specifically, papers will engage with course concepts, theories, and readings in order to analyse further the character and significance of their chosen location in relation to London’s identity as a global city. Your paper should provide insight into the relationship among the city, its inhabitants, and its global influences.

Papers should be analytical rather than descriptive and based on a clearly stated thesis. They should be approx. 1,000 words in length and should incorporate secondary research (min. 5 sources) as well as engage with course themes and concepts. Papers will be evaluated with respect to strength of argument, complexity of ideas, detail and sophistication of examples, and engagement with secondary sources and course themes. Ideally, papers will also engage with comments which derive from the class presentation and discussion. Each paper will be based on the student’s individual work. Further guidelines will be distributed in class.

FIELD STUDY ANALYSIS: 2000 words (30%)

This assignment is based on an analysis of three course field studies. The aim of the field study assignment is to ‘read’ the sites you encounter in order to assess their significance for understanding London’s development and character as a global city, and to write analytically about them. Your paper should be based on a specific theme linked to the field studies you have selected which relates to the nature of the global city and its development. Possible themes may include, but are not limited to: the impact of multiculturalism and migration, urban change and regeneration, arts and culture; globalisation and the city’s changing global connections; economic change; social dynamics; architecture and the built environment; heritage, tourism and the role of the past in shaping the present. Your paper should address the ways in which your chosen field studies enhance your understanding of global London in relation to these specific themes. Each paper should relate to the specific topics covered in class and demonstrate a firm understanding of the concepts and ideas discussed.

Papers should be analytical rather than descriptive and based on a clearly stated thesis and supported by specific details from the field studies, class handouts and readings. Whilst the primary source will be students’ own observations at the sites themselves, written analysis must be supported by a minimum of eight secondary sources, which should be cited in the text and in a final bibliography.

You will write on THREE of the following field studies:
1. Brixton walking tour
2. Imperial City: The Victoria & Albert Museum
3. East End Walking Tour
4. Southbank and Bankside
5. Queen Elizabeth Olympic Park
Students should also read further around the topics in preparation for their papers: relevant resources can be found in the CAPA Resource Centre as well as through students’ institutional online access to scholarly journals and the London South Bank University library. Specific study materials and questions to consider will be provided before each field study. Students can also include an analysis of photographs, charts and any other relevant material from the visit in their papers. Please feel free to contact me for topic advice and suggestions.

Class Participation: (10%)  
Active participation in lectures and field studies is an expected component of the course and will enhance students’ understanding of the material for their research projects, papers, presentation, and exam. Lectures and field studies encourage discussion based on students’ observations as well as insights from course materials. Students are expected to have completed the readings prior to each class and to contribute to discussion in an informed manner through relevant comments, questions, and analysis. Silent attendance at class will not result in a strong participation grade.

Students are responsible for ensuring that they sign the class register at the beginning of each class and field study. Students arriving late to any class must ensure they sign the register at the end of class.

Final Exam:  25%  
The final exam (2.5 hours) consists of two sections: a) a choice of short answer questions and b) an essay answer chosen from a selection based on the key themes covered in the course. Students will be required to consider and assess the relationship among different topics addressed in the course.

Assignments Policy  
You must complete all required components by the established deadlines. Late submission will incur a 5% per day penalty without the instructor’s prior approval of extension and may result in a grade of F for the course. If all work is not submitted by the end of the program, you will receive an F for the course. Electronic copies of written work will not be accepted, except where otherwise stated. Please keep a hard copy of all written work.

Lecture & Discussion: The impacts of inequality in London; urban regeneration projects and sustainability; the legacy of the 2012 Olympics.

Mulgan, G. (2015): ‘Our future is urban: why don’t we talk more about our cities?’, The Observer (online), 14 June, available at http://www.theguardian.com/cities/2015/jun/14/city-london-mayor-paris

Week 12: The Post-Olympic City  FIELD STUDY

Field Study: Queen Elizabeth Olympic Park  Meet at Pudding Mill Station,

Week 13:  Course Synthesis and Review

Lecture & Discussion: Course synthesis and review; London – a successful city? post-Brexit London; London’s impact on Britain.

Mulgan, G. (2015): ‘Our future is urban: why don’t we talk more about our cities?’, The Observer (online), 14 June, available at http://www.theguardian.com/cities/2015/jun/14/city-london-mayor-paris

FIELD STUDY PAPER DUE

Field Study: The Museum of London (TBC.)
Galleries of Modern London http://www.museumoflondon.org.uk/

Week 14: Final discussion & exam
Attendance, Participation & Student Responsibilities

Attendance: CAPA has a mandatory attendance policy. Attendance is taken at the beginning of every class. Unauthorized absence from class will result in a reduction of the final grade and potentially a failure for the course.

Missing classes for medical reasons: If you need to miss a class for medical reasons or for a family emergency, you must send an e-mail to let the Associate Director of Academic Affairs (ADAA) know at least one hour in advance of your class or meeting at the following e-mail: excused.absence@capa.org. Note that calling the CAPA Centre (0207 370 7389) is acceptable only if you do not temporarily have access to the internet. An e-mail is still required as quickly as you can get access to the internet again. You will need to provide evidence of the reason for your absence. Unexcused absences will result in a grade reduction. In the event of a missed class or field trip, it is your responsibility to contact your instructor and make up any missed assignments.

Class Participation: Students are expected to participate actively and critically in class discussions, and the participation portion of the class will be graded accordingly. Students must read assignments BEFORE the class, and come in on time. Participation is a vital part of your grade: students are expected to participate orally in seminars and in online forums and discussions in a critical and evaluative manner; to interact with the faculty and fellow students with respect and tolerance; and to actively engage in discussion. Derogatory or inflammatory comments about the cultures, perspectives or attitudes of others in the class will not be tolerated.

Academic Integrity: A high level of responsibility and academic honesty is expected. Because the value of an academic course depends upon the absolute integrity of the work done by the student, it is imperative that a student demonstrates a high standard of individual honour in his or her scholastic work and class behaviour. Plagiarism and cheating will result in dismissal from the program. See the Handbook of CAPA Academic Policies for more information and resources on plagiarism.

Use of Electronic Equipment in Class: All devices such as laptops, i-pods, i-pads, netbooks, notebooks and tablets, smartphones, cell phones, etc. are NOT allowed unless you have express permission from the faculty or you have been instructed to do so. If you require an accommodation to use any type of electronic equipment, inform the Associate Director of Academic Affairs at the beginning of Term.

Use of Electronic Translators: In Language courses students are NOT allowed to use electronic translators for writing texts in the target language: those submitting compositions and texts of whatever kind translated in such a fashion will receive a final F grade for the course.
**Late Submission:** Late submission of papers, projects, journal entries, pieces of homework and portfolios is only permitted with prior approval. A request must be made to the relevant Faculty member no later than two days prior to the due date. Late submission without prior approval will result in a full alpha grade penalty. In either case, work cannot be submitted after feedback has been provided to the rest of the class on the relevant assessment or one week after the due date whichever comes first, after which point a grade of F will be given for the assessment.

**Behaviour during Examinations:** During examinations, you must do your own work. Unless specifically instructed by the lecturer or instructor, talking during an exam is not permitted, nor may you compare papers, copy from others, or collaborate in any way. Any failure to abide by examination rules will result in failure of the exam, and may lead to failure of the course and disciplinary action.
